Appendix A: Campus and Community Resources for Title IX and Gender-Based Discrimination

Bentley University offers various resources for students, staff, and faculty seeking information or support regarding gender-based discrimination and harassment. SANE (Sexual Assault Nurse Examiners)

SANE (sexual assault nurse examiners) are registered nurses and nurse practitioners who have completed specialized training to assist sexual assault victims. They perform the pelvic exams and collect all forensic evidence (think CSI). SANE nurses are available at only specific hospital emergency rooms. The evidence collected is sealed in Massachusetts evidence collection kits (rape kits) and sent to a crime lab for evaluation. The SANE nurse records the victim's account of the assault and can testify at any legal proceedings. Additionally, the kits can remain confidential and are released to the police only at the victim's request.

Both the Boston Police Crime Lab and the State Police Crime Lab report that SANE nurses gather better evidence than non-SANE nurses. Also, having one person maintain control of all of the rape kit evidence before it gets to the lab reduces any chance of errors and makes prosecution of the perpetrator easier. The Massachusetts Department of Health reports that when a SANE nurse is utilized, a guilty verdict is returned 95 to 100 percent of the time.
