Students may use either FI 421- Internship in Finance or FI 401- Directed Study in Finance as one of their Finance electives, but not both. Students wishing to pursue a concentration in Financial Planning, Corporate Finance, or Capital Markets should consult the list of concentration courses on the second page of this form.
5. Elective guidelines are available on the Registrar's website.
6. An optional 12-credit minor program must be pre-approved by the appropriate academic department.

Finance

Finance is the study of the purchase and sale of assets by individuals and institutions and the methods used to fund these transactions. The markets in which these transactions occur and the pricing of the financial instruments are integral to the study of finance.

Through the Finance degree, you will develop a broad array of analytical skills, attain a thorough understanding of the finance function in different kinds of organizations, and gain a global perspective of the institutions and markets in which finance operates.

Required courses focus on the financial environment of business, the decision-making process of corporations, the key principles underlying the investment process, and the expanding international context of financial analysis, portfolio construction, and trading. You will focus on the applications of information processing technology in financial analysis and risk management.
