

**\*\*Important: A Jabber Account must be created by Telecom prior to installation. Open A Service Now Ticket Requesting this or contact the Help Desk for new account requests.**

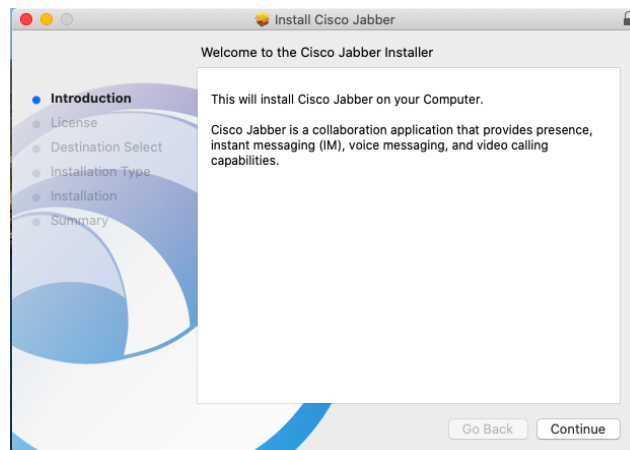

1. Browse to the following links to download the Jabber Client (Mac Version)

**Note-You must use the Safari Browser for this, if it isn't your default browser, copy/paste the link into the Safari browser window:**

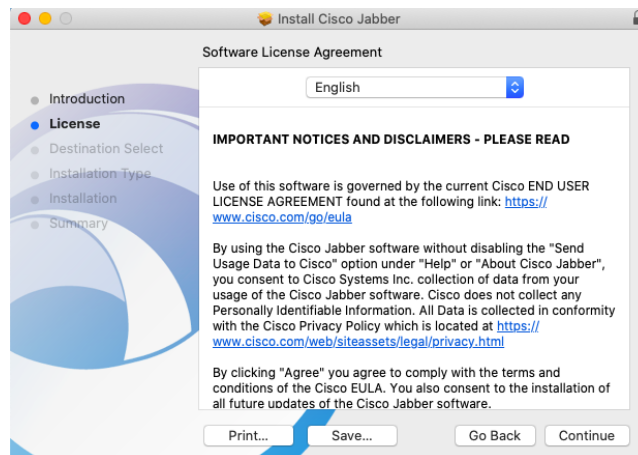

<https://www.bentley.edu/files/jabber/mac/CiscoJabberMac-14.1.3.307311.pkg>

2. Launch the install package and run through the installation process

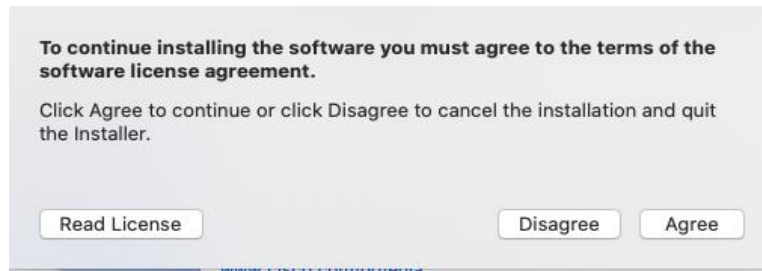

On the Introduction screen, click 'Continue'

On the License Screen click 'Continue'

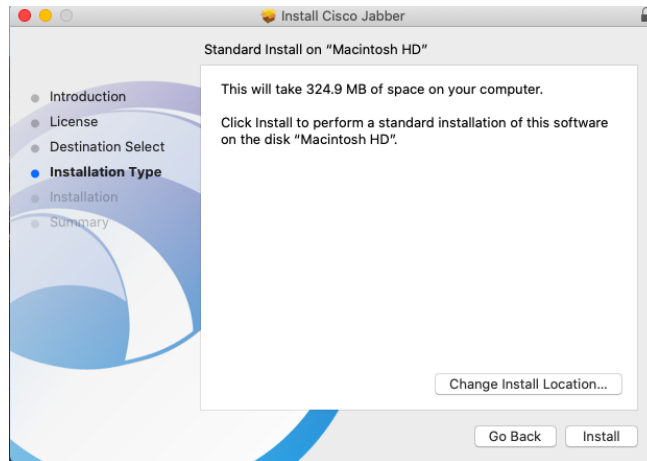

Click 'Agree'

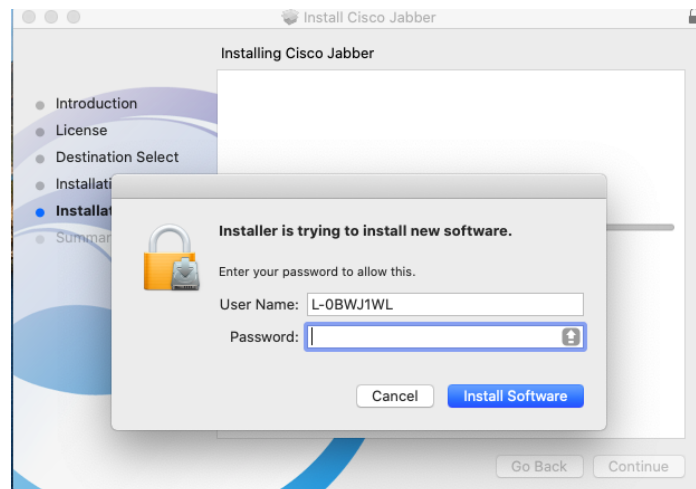

On the Destination Select screen, click 'Continue'

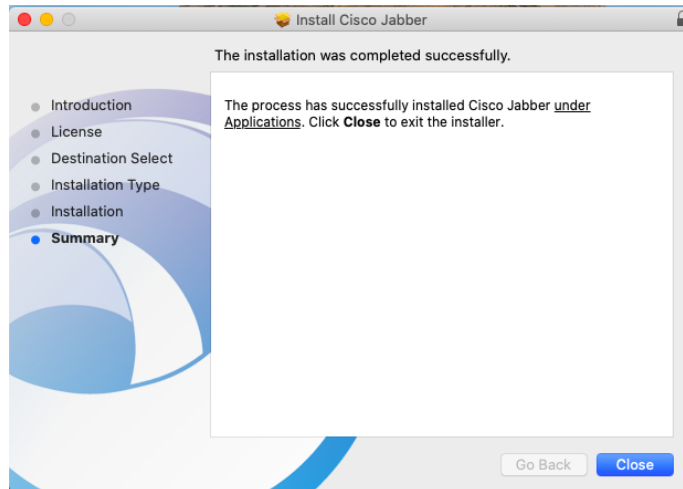

On the Installation Type screen, click 'Install'

Put in your Mac User Name(may fill automatically) and Password

Click 'Close' on Summary Screen

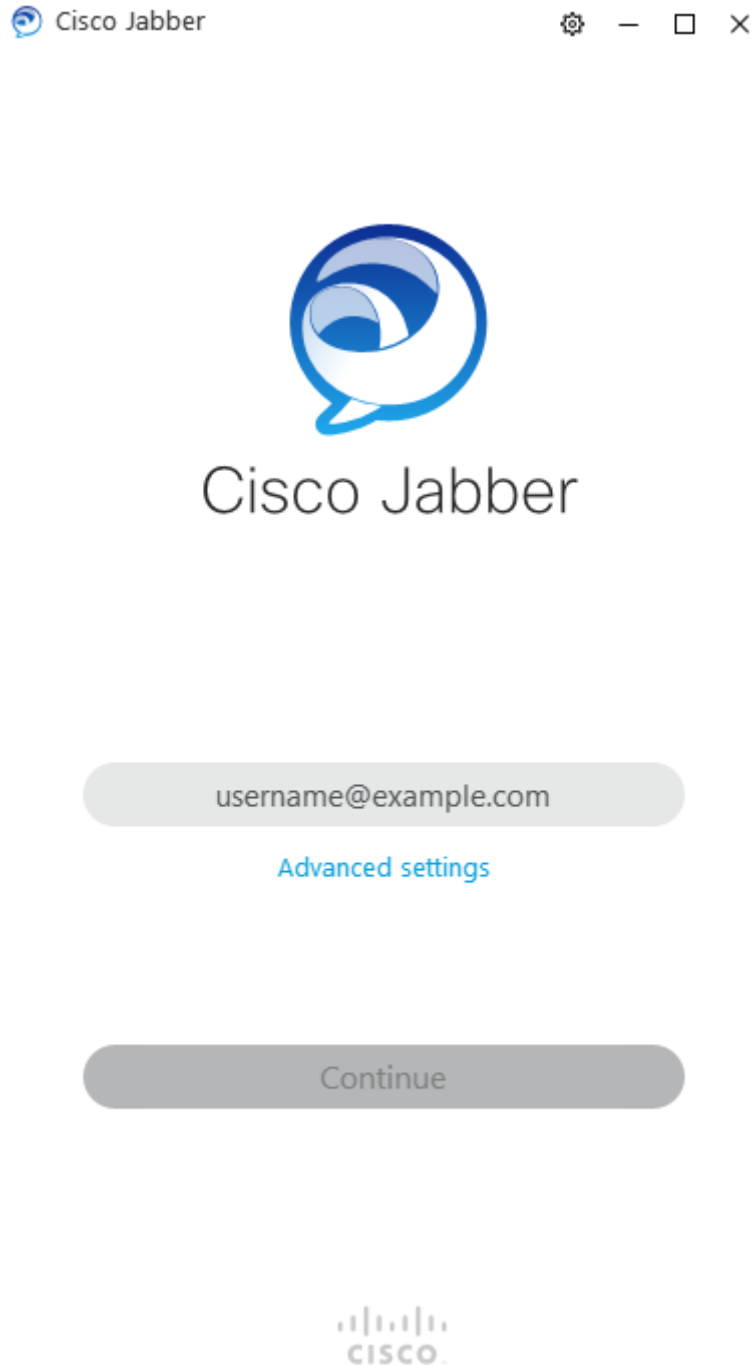

\*\*If you get the screen below or are asked if you want to allow Jabber Screen Recording, Just 'X' out of the screen or decline the request.

**IMPORTANT:** If you are installing Jabber remotely, at this point of the install you must be on VPN to successfully complete the process. If not, you will not be able to log in and the server address you enter in Advanced Settings will not be detected. Remember, any time you use Jabber remotely, you must be on VPN.

3. This will launch the Jabber App and you will see this screen, Click on Advanced Settings:

4. Select Cisco Communications Manager 9 or later

5. Select use the following server and enter vm2-ucs.ad.bentley.edu – Click SAVE

 Advanced Settings ×
